Amendments to the Claims:

The following listing of claims will replace all prior versions, and listings, of claims in the application:

- 1-9. (Canceled)
- 10. (Previously Presented) An electronic apparatus, comprising:

an active electronic device including: a carbon nanotube; a first electrode connected to one end of the carbon nanotube; a second electrode connected to the other end of the carbon nanotube; and a third electrode placed near the carbon nanotube to irradiate the carbon nanotube with electromagnetic waves; and

a driver circuit for causing the third electrode to output electromagnetic waves and varying a frequency of the electromagnetic waves to control a conductance of the carbon nanotube, wherein the frequency includes at least a predetermined frequency so that the conductance of the carbon nanotube is increased.

- 11. (Canceled)
- 12. (Previously Presented) An active electronic device according to claim 10, wherein the frequency is about 1GHz.
